Workshop
90 min or half day, up to ~30

Guest lecture
60–90 min, MBA and executive education

All talks in English or German.

ABOUT ANDREAS

Andreas Mitschke has spent more than fifteen years running growth and product experiments. His non-linear journey began at age 15. Before leaving his teens, he had run web design services, coded a Windows utility, and built a travel experience platform. From there, his path led from UX design to growth and product, across B2C and SaaS companies as well as B2B industrial and deep tech organizations. He has advised startups and scale-ups through funds including 500 Global and Loyal VC, evaluated and brokered deal flow for venture funds across Europe, New York, and Silicon Valley, and helped build Germany's largest academic deep tech program. Closer to the ground, he coached founders at Mannheim's startup centers and lectured on entrepreneurship and product discovery at universities in Germany. He is the author of Known Before Built: From Discovery to Decision for Enterprises in Transformation.
